PROFESSIONAL SUMMARY

Integration-focused Tech Lead with 15+ years of hands-on experience building, architecting, and owning ERP and payroll sync connectors in enterprise environments. Deep production experience with Totvs Protheus, Totvs Datasul, Senior ERP, Senior Vetorh (Payroll/HCM), SAP (RFC), Oracle EBS, Sankhya, and CIGAM — covering both on-prem and hybrid architectures. Proven ability to provide technical direction to external integration partners, lead architecture decisions, and personally build new connectors and API endpoints daily. Client-facing background with strong English communication skills, comfortable explaining complex sync behavior to non-technical stakeholders. Available for full-time remote opportunities.

TECHNICAL SKILLS

Languages: C#, .NET Framework / .NET Core, SQL, VBA, Visual FoxPro, PHP, JavaScript, LSP, Java, Spring Boot, Angular, Typescript, HTML, CSS

APIs & Integration: REST APIs, SOAP Web Services, JSON, XML, SOA, SAP RFC integrations, CSV import/export pipelines

Databases: SQL Server, Oracle, PostgreSQL, Progress/OpenEdge — advanced multi-DB joins and data analysis

ERP & Payroll Systems (Production):

Totvs Protheus | Totvs Datasul | Senior ERP (Sapiens) | Senior Vetorh — Payroll, Benefits, Occupational Health & Safety, People Management | SAP (RFC integrations) | Oracle EBS | Sankhya | CIGAM

Integration Architecture: Sync state management, conflict resolution, partial-failure recovery, reconciliation logic, idempotency, multithreading

Cloud / Infrastructure: Azure (Functions, Data Factory, DevOps), AWS fundamentals (EC2, S3, serverless concepts), Docker, Kubernetes

Tools & Practices: Git, Azure DevOps, Zendesk, Technical Documentation, API documentation, Advanced Excel

PROFESSIONAL EXPERIENCE

Solutions Supervisor / Tech Lead

Apr 2024 – Jan 2026

Fruki Bebidas S.A. — Lajeado/RS, Brazil

Fruki is one of the largest beverage manufacturers in Southern Brazil, with nationwide distribution. Responsible for leading technical teams and managing the IT demand portfolio, acting as the focal point between business and technology.

- Led a team of Business Partners and an outsourced development squad (systems analyst + Progress developer), totaling up to 9 direct reports.
- Implemented agile methodologies (Scrum and Kanban) with dailies, sprints, and refinements — structuring a predictable delivery flow with SLA of 5 business days for refinement and 20 business days for production delivery.
- Reduced the business demand backlog from 80+ tickets to 35 in 12 months, keeping operations stable with 20–30 new tickets coming in per month (original target was 50).
- Applied people management practices — mentoring, coaching, 1:1s, recognition, and hands-on collaboration — promoting engagement, belonging, and team autonomy.
- Later took over the corporate systems support team (2-level direct reports), also reducing the accumulated backlog on that front.
- Actively participated in satellite system implementation projects, managing resources and stakeholders throughout the full project cycle.

- Acted as the direct interface with business areas, translating complex needs into executable technical demands and managing delivery expectations.

▶ **Key Result:** Backlog reduced from 80+ to 35 tickets in 12 months — 57% reduction — with 20–30 new demands entering per month.

IT Specialist

Jan 2022 – Mar 2024

Group Indigo Brasil — Porto Alegre/RS, Brazil

Technical reference for corporate ERP systems (Senior Sapiens, Vetorh, Totvs Protheus) and HCM platform, covering advanced support, automation, and process improvement across enterprise clients.

- Served as senior technical reference for ERP environments (Senior Sapiens and Totvs Protheus) and corporate databases, acting as the escalation point for critical incidents.
- Served as technical reference for Senior Vetorh HCM platform across Payroll, Benefits, Occupational Health & Safety (ASO, CAT, PPP, PCMSO), and People Management modules — supporting functional users and integrations with corporate HR workflows.
- Developed and maintained SQL and VBA-based automation solutions, reducing manual rework and increasing operational efficiency across multiple areas.
- Produced technical and functional documentation for system maintenance, knowledge transfer, and onboarding support.
- Provided consultative support identifying process improvements and proposing solutions with measurable impact.

Business Analyst / Technical Consultant

Apr 2018 – Dec 2021

Mercanet – For Sales Management — Caxias do Sul/RS, Brazil

SFA (Sales Force Automation) platform with enterprise clients across Brazil. Focus on systems integration, backend development, and technical consulting — working across SAP, Totvs, and Sankhya environments.

- Led migration of a multi-ERP integration platform from Visual Basic to C#, reducing per-integration runtime from 6 hours to 5 minutes (98% reduction) across SAP, Totvs Protheus, and Sankhya environments — enabling the team to deliver multiple additional client integrations on the new architecture.
- Built and maintained backend integrations connecting ERP systems with external platforms via REST, SOAP, JSON, and XML, supporting data pipelines across SAP, Totvs, and Sankhya.
- Translated complex business requirements into technical specifications and developed functional solutions independently, providing consultative support throughout implementation.
- Created technical and functional documentation to accelerate onboarding and system maintenance.

▶ **Key Result:** Platform migration reduced integration runtime by 98% (6h → 5 min) across SAP, Totvs Protheus, and Sankhya — enabling delivery of multiple additional client connectors on the new C# architecture.

Systems Analyst / Full Stack Developer

Sep 2009 – Apr 2018

Design Software Ltda. — Caxias do Sul/RS, Brazil

9 years developing ERP software, integrations, and custom solutions for enterprise clients — covering fiscal, financial, commercial, supply chain, and HR domains using Visual FoxPro and C#.

- Developed ERP modules in Visual FoxPro and C# with focus on Brazilian tax compliance (SPED Contábil, Fiscal, Contribuições), invoicing, and operational workflows.
- Built e-commerce platform integrations and custom ERP integrations, connecting enterprise systems with external platforms.
- Led full ERP implementations — requirements gathering, solution design, budget estimation, development, production deployment, user training, and post-go-live support.
- Built SQL queries, reports, and system integrations across SQL Server and Progress/OpenEdge production environments.
- Supported clients through technical consulting, user training, and implementation of best practices for ERP adoption.

SELECTED ACHIEVEMENTS

- 98% reduction in ERP integration runtime (6h → 5 min) through full architecture migration from VB to C# — across SAP, Totvs Protheus, and Sankhya — enabling delivery of multiple additional client connectors on the new architecture.
- 57% backlog reduction in 12 months as Tech Lead — from 80+ to 35 open demands — while sustaining 20–30 new integration and ERP demands per month.
- 15+ years of production experience across 8 ERP/payroll platforms: Totvs Protheus, Totvs Datasul, Senior ERP (Sapiens), Senior Vetorh (Payroll/HCM), SAP RFC, Oracle EBS, Sankhya, and CIGAM.
- Progressed from developer to tech lead with full responsibility for delivery planning, team coordination, and stakeholder communication across manufacturing, distribution, and consulting sectors.

EDUCATION & PROFESSIONAL DEVELOPMENT

MBA — People Management, Leadership & Productivity2024 – Mar 2025

PUCRS Online

Associate Degree — Systems Analysis & Development2008 – 2011

FTEC Brasil

Professional Certifications

- AI Product Specialist — PM3 (Generative AI, LLMs, RAG architectures, AI agents, product strategy)
- Product Manager — PM3 (Discovery, backlog prioritization, product metrics, business-technology alignment)
